DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29, drawn to a method and program for displaying information about products and content based on a range of dates for which the availability dates of new products fall and a predicted level of user interest, classified in class 705, subclass 27.
- II. Claims 30-51, drawn to a method and system for presenting information about new items by performing a first and second filtering process to eliminate items from a set of items, classified in class 705, subclass 27.
- III. Claims 52-59, drawn to a memory and data signals for displaying a document containing a category name and a list of items whose effective dates qualify the items new items, classified in class 705, subclass 27.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method and program for displaying information about products and content which does not require the first and second filtering processes of invention II. See MPEP § 806.05(d).

Art Unit: 3625

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a document which does not require a predicted level of user interest. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a document which does not require the first and second filtering processes of invention II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

SPECIES

This application contains claims directed to the following patentably distinct species of the claimed invention:

In the event Applicants elect Group I above, they are further obligated to elect among the following species as follows:

species of claims 2-6,

species of claims 7,

species of claims 8 and 28,

species of claims 9,
species of claims 10,
species of claims 11,
species of claims 12,
species of claims 13 and 14,
species of claims 15,
species of claims 16,
species of claims 17 and 18,
species of claims 19,
species of claims 20 and 21,
species of claims 22,
species of claims 23,
species of claims 26,
species of claims 27,
species of claims 29.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 24, and 25 are generic.

In the event Applicants elect Group II above, they are further obligated to elect among the following species as follows:

species of claims 31,

species of claims 32,
species of claims 33 and 34,
species of claims 35,
species of claims 36,
species of claims 37,
species of claims 38,
species of claims 39,
species of claims 40,
species of claims 41,
species of claims 42,
species of claims 43,
species of claims 44,
species of claims 45,
species of claims 46,
species of claims 47,
species of claims 48-50,

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 30 and 51 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 3625

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
